

This itinerary is perfect for those who want to avoid the crowd in Central Atolls from the beginning. This 10 day itinerary allow us to explore the South without missing what makes it so special. We'll see abundant intact coral and extremely varied underwater topography, Manta Rays (and with a bit of luck Oceanic Manta), the biggest Wreck of Maldives, action pelagic dives in channels, whale shark at night and huge school of fish (jack fish, milk fish, snappers etc.).

### DAY 1

Pick-up at the airport in the morning or afternoon depending of the flight arrival. After around 20 minutes ride, you embark onboard Manta Cruise. This day is dedicated to all paper work, safety briefing, preparation of dive equipment, and a 1h snorkeling tour if schedules permit it. There is generally no dive the first day.

### DAY 2 to end of the trip

From day two to the day before your departure, we will organize 2 or 3 dives each day. Although we already planned a route for each trip, all the dives are decided along the way, depending on our guest wishes, weather and current conditions and Cruise Director recommendation.

During your trip, you will also have a chance to visit a local island, desert Island or also enjoy a nice dinner on the beach.

### LAST DAY

There is no dive organized the last day but you can stay onboard until your flight departure.

During this day you will have several options depending on feasibility:

- Stay in the boat.
- Go for snorkeling.
- Visit local island.

We will bring you to the airport 2h before your scheduled flight.
